

Clip Clamp

W4

The Clip Clamp is manufactured entirely from one strip of stainless steel.

The design of the locking mechanism of the Clip Clamp allows for great precision and safety in assembly. This mechanism, together with the folds in the material confers a spring function to this clamp, meaning that it can maintain constant pressure around the hose despite possible changes in temperature or pressure.

The perfectly rounded band edges avoid damage to the hose during application. The corrosion resistance is excellent due to the AISI 304 material employed in its manufacture.
